EDUCATION

B.Tech – Information Science & Engineering
REVA University
2025 – 2029

TECHNICAL SKILLS

- Languages:**
Python, C
- AI/ML & Tools:**
Hugging Face, Lyzr, OpenEnv, OpenCV, NumPy, Pandas
- Web Development:**
HTML, CSS, JavaScript
- DevOps & Tools:**
Docker, Git, GitHub

CERTIFICATIONS

- Python Programming (Coursera)
- Machine Learning Fundamentals
- Hugging Face Course
- Docker Essentials
- Git & GitHub Certification

KEY STRENGTHS

- Leadership & Team Management
- Problem Solving
- Public Speaking
- Technical Documentation
- Project Management
- Innovation & Entrepreneurship

PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer and Technical Leader with hands-on experience in intelligent systems, IoT-based automation, and AI-powered applications. Currently serving as Technical Co-Head at IEEE TEMS, REVA University, leading innovation initiatives and technical events. Passionate about leveraging Artificial Intelligence, Machine Learning, and emerging technologies to develop impactful real-world solutions.

INTERNSHIP

Technical & Digital Operations Intern | OptCell Global
Dec 2025 – Mar 2026 | Remote

- Contributed to the planning, development, and execution of corporate web projects and digital initiatives.
- Collaborated with cross-functional teams to identify and solve real-world technical challenges.
- Assisted in digital operations, workflow optimization, and project coordination activities.
- Gained hands-on experience with industry-standard development processes and agile work environments.
- Supported technical documentation, testing, and deployment activities.
- Strengthened skills in web development, project management, analytical thinking, and professional communication.

Skills & Outcomes:

Web Development Digital Operations Project Coordination Leadership
Analytical Thinking Agile Workflows

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Technical Co-Head – IEEE TEMS, REVA University
2026 – Present

- Leading technical initiatives and innovation programs.
- Coordinating workshops, hackathons, and project showcases.
- Mentoring members on AI and development technologies.

PROJECTS

Autonomous AI Surveillance Rover (Yugēn)
• An end-to-end distributed architecture for real-time surveillance and threat detection.
• Implemented computer vision (YOLOv8) and biometric threat detection.
• Achieves professional-grade security monitoring with low-latency edge processing.

ESP32 YOLOv8 Computer Vision WebSockets

AutoSRE
• Interactive RL simulation environment for server reliability and recovery.
• Simulates critical production crashes and trains autonomous AI agents.
• Built during Meta PyTorch OpenEnv Hackathon.

Python RL Environment OpenEnv API

TerraSense
• Enterprise-level agricultural dashboard with AI-driven insights.
• Showcases hardware specs and smart agriculture solutions.
• Interactive visualizations for precision farming analytics.

TypeScript Dashboard Agriculture AI

OpenEnv_prop
• Production-grade web interface built with Gradio.
• Automatic JSON parsing and validation for backend servers.
• Streamlined tool invocation and process automation.

Python Gradio JSON Parsing Backend

AI SOC Threat Pipeline
• AI-powered SOC incident triage and threat analysis pipeline.
• Deployed using FastAPI and Hugging Face Spaces for live inference.
• Enables real-time threat detection and automated triage.

Python FastAPI Hugging Face AI SOC

ACHIEVEMENTS

- Selected as Technical Co-Head – IEEE TEMS (2026–27)
- Active contributor to innovation and entrepreneurship initiatives.
- Participated in ideathons, technical events, and innovation programs.

RESEARCH & INNOVATION INTERESTS

Artificial Intelligence Machine Learning Computer Vision IoT Autonomous Systems
Defense Technology Robotics Edge Computing

PERSONAL DETAILS

Date of Birth : 12 May 2007 Hobbies : Coding, Robotics, Reading, Exploring New Technologies
Languages : English, Hindi, Bengali Strength : Dedication, Adaptability, Curiosity
Nationality : Indian
